

# ECOTOURISM AND NATURE PROTECTION

Ecotourism is a well-known and well-developed tourism sector in Europe, which is growing very rapidly thanks to the interest of the people and the political and financial support of the European Community, which is increasingly directed towards the conservation of traditional landscapes and biodiversity, including in urban areas, as well as the development of innovative and intellectually intensive forms of entreprenurship.  The course includes lectures, illustrations and examples from the field of ecotourism and environmental protection. The following methods are used: discussion, analysis of different situations.  To raise awareness of environmental issues and ecotourism as a sustainable tourism segment development of the environment, the principles of its organisation and the social role of ecotourism.  Tasks of the study course  Tasks of the study course included the social rate of the service of the secondary course of the service of the service of the secondary course of the service	<b>Credit Points:</b>	3 CP
European Community, which is increasingly directed towards the conservation of traditional landscapes and biodiversity, including in urban areas, as well as the development of innovative and intellectually intensive forms of entrepreneurship.  The course includes lectures, illustrations and examples from the field of ecotourism and environmental protection. The following methods are used: discussion, analysis of different situations.  Aim of the study course  To raise awareness of environmental issues and ecotourism as a sustainable tourism segment based on the nature tourism sector. To create awareness of its importance for the preservation and development of the environment, the principles of its organisation and the social role of ecotourism  - to introduce the concept and types of environmental protection and ecotourism; - to develop an understanding of environmental and nature protection policies and their implementation; - to develop an understanding of the impact of ecotourism on nature and protected areas; - to introduce international organisations in the field of ecotourism worldwide; - to test and consolidate the knowledge and skills acquired through self-assessment questions.  Knowledge  - knowledge of eco-tourism and environmental protection in different countries; - organisations and documents drawn up by them in the field of environmental protection and eco-tourism; - familiarise themselves with the laws governing the development of eco-tourism and environmental protection; - knowledge of the importance of eco-tourism for the preservation and development of the environmental protection; - knowledge of the importance of eco-tourism for the preservation and development of the environmental protection; - knowledge of the principles for organising it, the fundamental motives of eco-tourism, the social nature of eco-tourism in the principles for organism in the preservation and developments; - skills in shaping, evaluating, pricing services and determining and analysing economic performance of ecologic	Study course	Ecotourism is a well-known and well-developed tourism sector in Europe, which is growing
